

#### Update on Town Highway Garage Wash Bay:

The town's project to install a wash bay at the town highway garage is nearing completion. The wash bay will allow the town to clean vehicles, particularly the large trucks, keeping salt and dirt off them and extending the life of the vehicle by many years. The town has also secured the commitment from other municipalities and the Arlington School District to use the facility as well. This will provide them with the same advantages of longer vehicle life, saving taxpayer dollars and offsetting our costs, by sharing of services. We expect the facility to be open and operational before the first snowstorm. As required by state law, all of the water used for the cleaning will be captured and treated in an environmentally appropriate manner.
