Street Address _____

Lot & Block No. _____

Other Description (attach plans in duplicate showing location, dimensions and elevation of area in question; existing or proposed structures; fill; storage or materials, drainage facilities).

1. Describe the work to be covered by the permit for which the application is made.

2. Indicate the use or occupancy for which the proposed work is intended.

3. Provide the proposed elevation, in relation to mean sea level, of the lowest floor (including basement or cellar) of any new or substantially improved structure to be located in Zones A1 – A30, AE or AH, or Zone A if base flood elevation data are available.

4. Provide the proposed elevation, in relation to mean sea level, to which any new or substantially improved non-residential structure will be floodproofed.

5. Provide a certificate from a licensed professional engineer or architect that any utility floodproofing will meet the criteria in Section 45-16 (C), Utilities of the Town Flood Damage Prevention Code.

6. Provide a certificate from a licensed professional engineer or architect that any non-residential floodproofed structure will meet the floodproofing criteria in section 45-18, “Non-Residential Structures”.

7. Describe the extent to which any watercourse will be altered or relocated as a result of proposed development. (Computations by a licensed professional engineer must be submitted that demonstrate that the altered or relocated segment will provide equal or greater conveyance than the original stream segment.)
